Application #: _____

WESTPORT™

SCHEDULE D: WATERWAY PROTECTION LINES

PROJECT ADDRESS: 4 Marsh Court, Westport, CT 06880

Due by 4:00 p.m. on 12 September 2023

1. Explain/submit information showing why/how the proposed activity as located within Waterway Protection Lines will not cause flooding, drainage, erosion and/or related conditions hazardous to life and property and will not have an adverse impact upon the flood-carrying and water-storage capacity of the town's waterways, including but not limited to the impact upon flood heights, hydrological energy flow, maintenance of essential and natural patterns of water circulation, drainage and basin configuration and maintenance of fresh- and saltwater exchange through the placement of culverts, tide gates or other drainage flood-control structures. (sec.148-8)

The activity is construction a structurally-minimized private recreational boating facility. The floating dock will be anchored by two struts of sufficient strength to preclude displacement in the event of flooding or high-velocity water flows. The floating dock will not impede water flow or circulation.

2. Explain/submit information showing why/how the proposed activity as located within the Waterway Protection Lines will not cause water pollution, erosion and/or environmentally related hazards to life and property and will not have an adverse impact on the preservation of the natural resources and ecosystems of the waterway, including but not limited to impact on ground or surface water, aquifers, plant and aquatic life, nutrient exchange and supply, thermal energy flow, natural pollution filtration and decomposition, habitat diversity, viability and productivity and natural rates and processes or erosion and sedimentation. (sec. 148-9)

The activity has been sited and will be built so as to prevent erosion to intertidal areas which might degrade water quality. The minimization of structural components and overall encroachment into the waterway will prevent adverse impacts to the waterway, its resources and ecosystems.

3. Other: The activity was reviewed by the CT Department of Energy and Environmental Protection and the Army Corps of Engineers. The applicant received CT DEEP License 202302387-LISGP. The work is authorized by the Corps' CT General Permit Category 4.
