APPENDIX D, LOT CALCULATIONS *Revised 10-14-03*

The following directions should be used in conjunction with the "Lot Area Worksheet "attached.

Line 1-Gross Lot Area

Lot area in square feet based on a Class A-2 survey of the lot lines. Do not include the area of the accessway for a rear lot per §31-2.2.4, herein.

Line 2-Above-Ground Utility Easements

Include all easements for above ground utilities, or , in the absence of an easement, the minimum area recommended by a utility company for public safety. Exclude easements for underground utilities.

Line 3-Streets and Roads

Include any and all parts of public or private roads or streets.

Line 4-Other Exclusive Surface Easements

Include any easement that grants **exclusive** surface use of the property to anyone other than the owner.

Exclude drainage easements and conservation easements. .

Line 5-Total Easements and Roads

Sum lines 2, 3, and 4 and enter here.

Line 6-Wetlands

Include: Land covered by waterbodies, water courses and lands officially designated inland and tidal wetlands.

Exclude: Any land located below the mean high water line (MHWL) along the Long Island Sound and/or the Saugatuck River south of the Kings Highway Bridge (Route 57). This land may not be counted in any calculations.

Line 7-Steep Slopes of 25% or greater

Include: Land of severe topography having slopes of 25% or greater. This land must be measured between each contour interval on a topographic map with one (1) or two (2) foot contours.

Exclude: Any land that was counted in the wetlands requirement. (i.e. do not count the overlap, if any, between the two areas here).

Line 8-Total Wetlands & Steep Slopes

Sum lines 6 and 7 and enter here.

Line 9 - District Maximum

No more than 20% of the district minimum lot size may be met by wetlands or steep slopes over 25%. Copy the maximum permitted amount from the table.

Enter whichever number is smaller--either line 8 or line 9.

Line 11 - Actual Lot Size

This is the amount of land available for computing the compliance with the minimum lot regulations. Compute Line 1, minus line 5, minus line 8, **plus** line 10.

Line 12 - District Minimum Lot size

Each district has a minimum allowed lot size. Determine the appropriate zoning district for the lot, and enter the value from the table.

Line 13 - Excess or Shortfall

If line 13 is positive, the lot complies with the zoning regulations for lot area. Otherwise, the lot does not comply.

Line 14 - Total Lot Perimeter

Enter the Lot Perimeter, which is found by adding up the lengths of the line segments found on an A-2 Survey Map. For purposes of this calculation, the lot perimeter may be configured to exclude any portion of lot area in excess of minimum required lot size. This is done in order to avoid having long narrow lots that are conforming in size and shape not meet the Regularity Factor.

Line 15 - Perimeter Squared

Multiply the Perimeter by itself and enter the value into the table.

Line 16 - Lot Area in Square Feet

Enter the gross lot area in square feet and enter the value into the table.

Line 17 - Lot Area Multiplication

Multiply the lot area by the number 16 and enter the value into the table.

Line 18 - Regularity Factor

Divide the number on line 17 by the number on line 15. Enter the resulting number into the table. The number must be at or above 0.55 for the lot to have a complying shape. This is in addition to the lot containing the required rectangle.
